DevOps Cloud Engineer with 5+ years of software engineering experience and AWS Certified Solutions Architect (Associate). Specializing in building scalable, secure, and highly available cloud environments. Expert in Infrastructure as Code, automation, and CI/CD pipelines to accelerate delivery and improve system reliability. Skilled in optimizing AWS workloads for performance, cost efficiency, and operational excellence.

Technical Tooling

- **Languages:** JavaScript, TypeScript, Python, Java
- **Tools and Frameworks:** AWS (IAM, EC2, ECS, S3, Lambda, DynamoDB, RDS, VPC, CloudFront, API Gateway, CloudWatch), Terraform, Git, GitHub Actions, Linux CLI, Docker, Kubernetes, React, Redux, Emotion, Storybook, Node.js, Strapi, Spring Boot, Cypress, Jest, JUnit
- **Expertise:** Cloud Architecture, Infrastructure as Code (IaC), CI/CD Pipeline Automation, Serverless Application Design, Full-Stack Development, Performance Optimization, API Integration, Security & Compliance, Cost Optimization, Monitoring & Troubleshooting, Scalability & Reliability Engineering, Agile Collaboration

Work Experience

Software Engineer | **Orion Health** | **April 2022 - February 2025**

Auckland, New Zealand (Remote)

- **Engineered and optimized the Digital Front Door (Virtuoso) platform,** improving digital health access and self-service experiences for 15M+ users across North America and 12+ global deployments.
- **Built and maintained a scalable React + TypeScript UI component library, accelerating feature delivery,** improving consistency across products, and reducing frontend maintenance effort.
- **Extended Strapi (Node.js Headless CMS)** through custom plugins, middleware, and API enhancements, enabling product-specific configurations and reducing time-to-customize for new deployments.
- **Automated complex content migration workflows by developing Python CLI tools,** cutting manual admin time and CMS content operations by 90%+.
- **Improved accessibility and performance across applications,** contributing to WCAG compliance, enhanced Lighthouse scores, and stronger usability across mobile and desktop devices.
- **Led technical design discussions, drove architectural decisions for feature integrations, and improved cross-team alignment** through clear documentation and solution proposals.
- **Collaborated with designers, product managers, and backend teams in an Agile environment,** contributing to sprint planning, code reviews, and structured release documentation.
- **Nominated for an Employee Excellence Award** for initiative, collaboration, and consistently delivering high-quality, production-ready software.

Full-stack Developer | **Orange Business Services** | **September 2016 - September 2019**

Rennes, France

- **Developed and maintained the Flux Vision analytics portal used by 70+ enterprise and public-sector customers,** enabling access to dashboards/reports generated from 15B+ anonymized mobile events/day.
- **Built frontend modules using Angular and TypeScript and developed backend RESTful APIs with Java and Spring Boot,** ensuring seamless data flow, scalability, and system reliability.

- **Enhanced deployment quality by implementing automated testing with JUnit** and contributed to Agile delivery and CI/CD automation through GitLab and Jenkins.

Education

Engineering Degree (Master's Level) in Computer Science, INSA Rennes, France **September 2011 - September 2016**

Projects

3-Tier web application **August 2025 - September 2025**
Designed and deployed a resilient, scalable, and secure full-stack web infrastructure using AWS ECS, RDS, API Gateway, Lambda, S3, CloudFront, and Route53. Implemented Infrastructure as Code (IaC) for scalable and safe deployments across environments, reducing setup time and improving reliability.

Serverless File Uploader **September 2025**
Developed a serverless file upload system leveraging S3, API Gateway, Lambda, SNS, and DynamoDB, integrated with BucketAV for antivirus scanning. Automated file validation and storage, ensuring high availability and compliance with security best practices.

Serverless Image Moderator **October 2025**
Built a real-time image moderation workflow using Amazon Rekognition, SNS, Lambda, and EventBridge, automating inappropriate content detection. Enhanced operational efficiency through automatic tagging, alerting, and quarantining of flagged assets, ensuring content moderation accuracy and reliability.

Certifications

HashiCorp Certified - Terraform Associate (003), HashiCorp **November 2025**

AWS Certified Solutions Architect - Associate, Amazon Web Services **October 2025**

Languages

English (Bilingual C2), **French** (Bilingual C2), **German** (Elementary A2), **Malagasy** (Native)
